CTW 2013

The workshop will be held at the secluded Kata Noi bay at Phuket, Thailand's largest island with many beautiful beaches. The continued success of this workshop lies in its informal and highly interactive atmosphere. The goal of this year's workshop is to explore research at the intersection of theory and practice. Participants will include experts from both industry and academia. A focus of the workshop will be on broad discussion of the future of communications. As always, the workshop will be single track, with four/five technical sessions, three plenary speakers, three panel discussions, and a hot-topics poster session.

Call for Hot Topics Posters

The technical program committee is soliciting contributions for an afternoon poster session devoted to recent results. We especially encourage students and junior researchers to participate. There will be no published proceedings. Any contribution in the general area of communication theory is welcome. Extended abstracts (2 pages maximum, double column, IEEE style) for the poster session should be submitted with **CTW 2013** in the subject to Matthew McKay at eemckay@ust.hk.

Electronic submissions must be in PDF format and provide sufficient details for careful reviewing.
